How to Replace Battery

This timer is powered with a piece of LR44 or equivalent. Please follow the steps below to replace battery:

1. Use a proper size of "-" screw driver to insert to the position of the arrow shown on Fig. a, and open the back cover.
2. Use the same screw driver to push battery out of the metal holder as the drawing shown below.
3. Discard the old battery.

4. Insert a fresh battery (positive side up) into the metal holder.
5. At the meantime, full LCD blinking and alarm goes off for 3 seconds, then display ^H00^M00.
6. Restore the back cover. Be sure the mark "Made in Taiwan" is at the lower position.
